

Autodesk® Technology at your fingertips

Autodesk Navisworks Manage plug-in for SMART Board

Control/Edit Autodesk® Navisworks® Manage files directly from your SMART Board® interactive display with the idsDesignTOUCH™ Autodesk Navisworks Manage plug-in for SMART Board.

Plug-in Features

- Intelligent SMART Board interactive displays, pen tray, and touch recognition
- Pan, zoom, pivot point orbit
- Redline markups directly in the 3D model
- Capture notes as a part of the Navisworks model
- View Capture utility integrated with SMART Meeting Pro™ software (PDF & PPT files supported)
- Integrated with Bridgit® conferencing software to support global collaboration

Benefits

- Tighter integration between Navisworks Manage and SMART Board interactive displays
- Efficiently communicate daily project updates, materials delivery, complex assembly and construction sequences and other project data to local and remote project team members
- Catch design deficiencies that may be costly to rectify later in the construction schedule
- Take an intelligent BIM model from the traditional office-bound workstation to on-site facilities

Realize Improved Coordination of 3D Design Reviews

How does the software work?

The Autodesk Navisworks Manage plug-in for SMART Board interactive displays is installed on a machine that has Autodesk Navisworks Manage installed as well as the SMART Board drivers.

Once the plug-in is installed there is no additional configuration; a user simply loads Navisworks Manage and the plug-in is auto-loaded.

System Requirements

- SMART Board 800 series interactive whiteboard and SMART Board 8000 interactive flat panels are both supported, and the latest versions include:
 - SMART Meeting Pro 3.0
 - Bridgit conferencing software 4.5*
- Operating System: 32-bit Windows XP, or 32-bit/64-bit Windows 7
- Navisworks Manage: 32-bit or 64-bit versions releases (2013, 2012, 2011)
- Most recent SMART Board drivers

*Please note Bridgit software license must be purchased additionally to enable remote collaboration.
